SUMMARY

Computer Science undergraduate specializing in Machine Learning and AI, with strong technical and product-thinking capabilities across AI-driven product development, automation systems, and scalable user-centric solutions. Experienced in Generative AI workflows, AI integrations, product analytics, and experimentation. Passionate about transforming real-world problems into practical AI-powered products through data-driven strategy, model implementation, and continuous product optimization.

EDUCATION

SRM Institute of Science and Technology

Bachelor of Technology in Computer Science Engineering

University of Bristol, Bristol

Higher Education in Aeronautical Engineering

Chennai, India

Oct. 2022 – May 2026

England, United Kingdom

2021–2022

EXPERIENCE

Cosmic Zenith Solutions Ltd

Software Developer Intern

Delhi, India (Hybrid)

June 2025 – May 2026

- Engineered full-stack features for www.Casafurnea.com, a premium e-commerce platform, utilizing Next.js, TypeScript, and Tailwind CSS, including a custom WhatsApp-integrated product catalog and seamless quotation-request workflow.
- Architected RESTful APIs for scalable product, inventory, and order management, while developing a dynamic page builder and comprehensive category modules to optimize administrative operations.

PROJECTS

Multimodal Medical Diagnosis System For Lungs

Deep Learning · Medical Imaging · IEEE Research Project

- Built an explainable AI pipeline for chest X-ray disease detection, benchmarking DenseNet-121, Swin-T, and CNN-Transformer Hybrid models with AUC-focused training and GradCAM++ interpretability.

Traffic Optimization System

Computer Vision · YOLO Detection · Real-Time Analytics · Adaptive Control · FastAPI

- Developed a real-time traffic optimization platform combining YOLO-based vehicle tracking, polygon-zone lane counting, adaptive signal control, and simulation analytics through an interactive FastAPI web dashboard.

Sentiment Analysis of Text Reviews

Natural Language Processing · Machine Learning · FastAPI Deployment

- Developed an end-to-end sentiment intelligence pipeline, benchmarking classical NLP models against a tuned BiLSTM and deploying real-time review classification through a FastAPI/Docker REST API.

CERTIFICATES

AWS Academy Machine Learning Foundations, AWS Academy (2024)

Database Management Systems, Scaler (2024)

Machine Learning A-Z, Udemy (2024)

Udemy The Complete Python Bootcamp, Udemy (2023)

SKILLS

Programming Languages: Python, SQL, R, C++, TypeScript, JavaScript

Frameworks & Libraries: PyTorch, TensorFlow, Scikit-learn, YOLO, OpenCV, Pandas, NumPy, Matplotlib, React

Databases: MySQL, PostgreSQL, MongoDB

AI/ML & Product: Generative AI, LLMs, NLP, Machine Learning, Deep Learning, AI Solution Design, AI Integrations, Model-Driven Product Optimization

LeetCode Profile: leetcode.com/luvvv19
